Strategic Plan Progress Report

T1: January to April 2025

CONTENTS

On May 20, 2022, Morinville Council approved its Strategic Plan to guide the corporation for the current term of Council. The Strategic Plan, updated in spring of 2024, consists of six goals and will remain in place until 2025. Upon adoption of the Strategic Plan, Administration began working on implementing the plan by developing the Corporate Business Plan that articulates specific actions to help meet Council's goals and achieve Morinville's vision and mission. This report aims to update Council on the strategically aligned outcomes achieved from January to April 2025. During this time, Administration was also engaged in day-to-day operations, delivering core services and programs, and participating in other significant initiatives. As 2025 is the fourth and final year of this plan, Morinville is striving for the completion of all goals and initiatives outlined to ensure strong delivery on Council's priorities.

2025 Financial Update

Statement of Operations

The T1 2025 financial report reflects a strong start to the year, with both revenues and expenses generating favourable variances. Overall, Morinville is reporting a positive net variance of \$2.3 million. Higher-than-budgeted revenues are primarily attributed to increased franchise fees and stronger performance in sales and user fees. On the expense side, positive variances are mainly driven by lower-than-expected costs in salaries and benefits, equipment repairs and maintenance, building and grounds maintenance, and utilities.

2025 Financial Update

Tax-Supported Operations

Tax-supported revenues have exceeded expectations in the first trimester. This positive performance is largely due to development fees and permits, which are tracking \$110,000 ahead of T1 projections and represent 85% of the total annual budgeted amount. Additional favourable revenue variances include:

- Franchise fees: \$78,000 above year-to-date budget
- Sales and user charges: \$49,000 above budget
- Sponsorships: \$36,000 above budget

On the expenditure side, the most notable positive variances are in:

- Salaries and benefits
- Contracted services
- Building and grounds maintenance

It is anticipated that salary and benefit variances will narrow as staffing levels increase and accruals are processed. Similarly, contracted services variances are expected to decrease as outstanding invoices are received and paid.

2025 Financial Update

Utility-Supported Operations

Utility-supported revenues are currently 2.4% below budget. As previously noted, these revenues can vary throughout the year based on actual usage.

Utility-supported expenses are currently under budget. Some of these cost savings are tied directly to lower usage, while others are expected to align with the budget later in the year as service demands and invoice processing normalize—mirroring trends seen in tax-supported expenses.
